# Adding Preferences

PlanCompare
Edge

Agents and beneficiaries can add preferences for a more personalized shopping experience, along with the ability to see the most accurate cost estimates for every plan option.

## Add Preferences for a more personalized member experience

Upon adding preference information, a score is given for each plan type and each plan. This preference score is helpful for sorting plans and guiding beneficiaries to their best fit plans. Health and drug information can be used to calculate estimated drug and health costs.

These costs are highlighted on the Plan Cards with details provided in the Plan Details pages.

Preferences ^

Get Started Edit
Extra help: No, I am not eligible for special assistance

Health Edit
- Generally healthy
- 65-69

Providers Edit
- Dr. Henry Yamp... (PCP)
- 90210 Surgery ...
- Richard K Mettel

Prescriptions Edit
gabapentin CAP...
Lotensin TAB 20MG

Pharmacy Edit
Sunset Walk-In... (primary)

Add ⊕

Add Preferences from the **Get Started** page, including:

- Health
- Providers
- Prescriptions
- Pharmacy
- Low Income Subsidy
- Other Preferences

Get Started

From this page beneficiaries can answer a subsidy level question. After choosing the "type" of coverage beneficiaries are interested in, they can answer an optional question—"Do you receive extra help paying for prescription drugs?" How they answer this question will be reflected on the plans list page.

Health

Choose health status and age to be used to calculate estimated plan costs. Health options include: good health, some health needs and significant health needs. These selections do not affect premiums.

Providers

Search for the beneficiary's providers and view provider networks for all available plans. Easily see if the PCP is in network prior to enrollment. The Primary Care Provider ID can be passed into the enrollment application if the PCP is eligible for the plan.
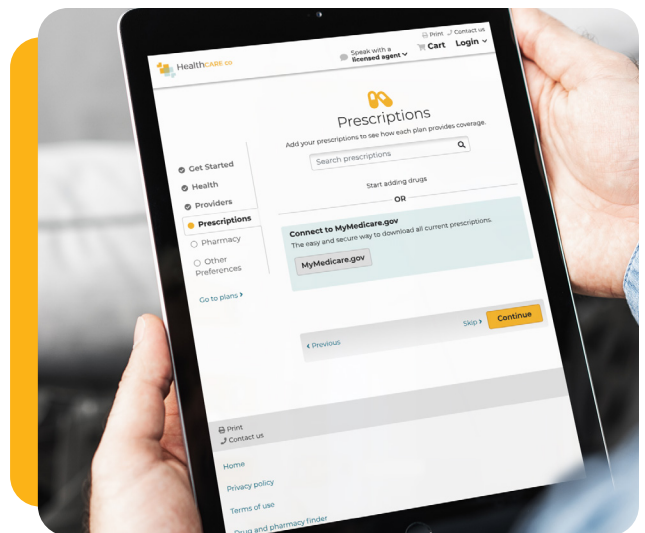

Prescriptions

Build a medicine cabinet of all current drugs to see drug costs associated with all plan options.

Drug costs also reflect the most current federal and CMS rulings such as capped costs for insulin and covered vaccines

Once a drug is added, beneficiaries can:

- Select dose/form, quantity and frequency
- Change to a direct generic, if available
- See if drugs are covered by a plan's formulary

Connecting to MyMedicare.gov is also an option to build out a medicine cabinet without having to manually type in drug lists. This is an easy and secure way to download all current prescriptions.
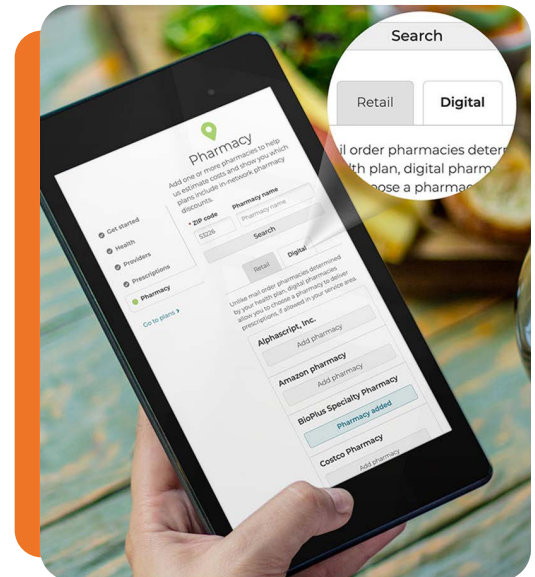

Pharmacy - Retail, Mail Order, Digital

Add one or more pharmacies to help us estimate costs and show you which plans include in-network pharmacy discounts.

ConnectureDRX uses NABP IDs and health plan pricing for select digital pharmacies.

Note: Every beneficiary has access to the most accurate drug costs based on local pharmacy pricing. Since no cost averages are ever used, our drug pricing transparency ensures every beneficiary sees reliable annual out-of-pocket estimates, critical for finding their best fit Medicare plan.

Side-by-side Plan Comparisons and Enrollment

Once preferences are added, beneficiaries can select up to three plans to compare side-by-side. They can add to cart or quote and follow the process to complete an enrollment.
