

AEP 2023

Building a Medicine Cabinet with Blue Button

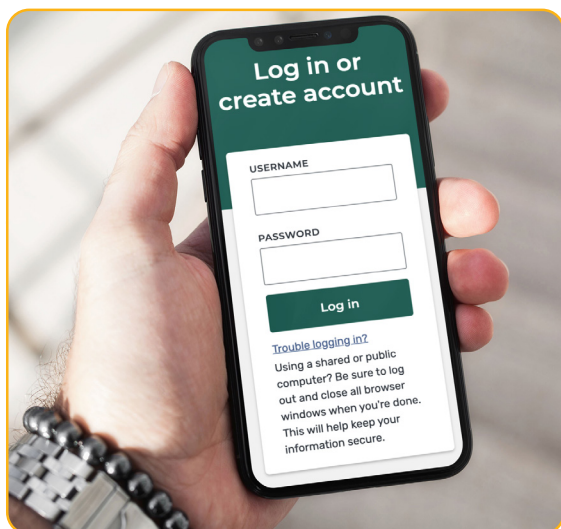

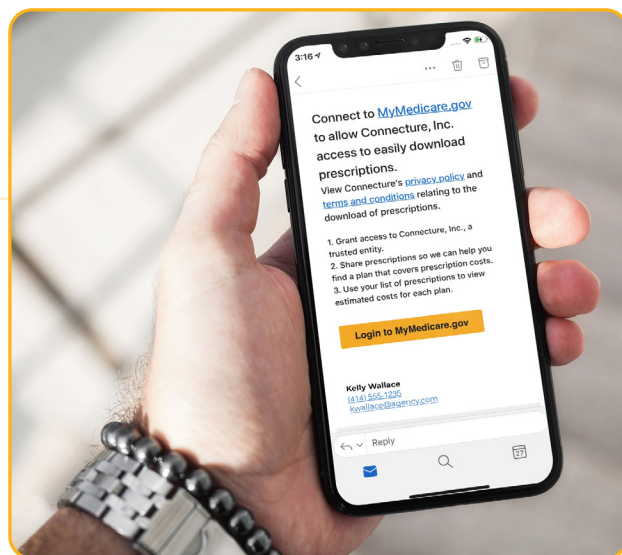

Beneficiaries have the option of entering their medications manually or using MyMedicare.gov to download their claims data and load prescriptions automatically.

AGENT VIEW – REQUEST ACCESS TO MYMEDICARE.GOV:

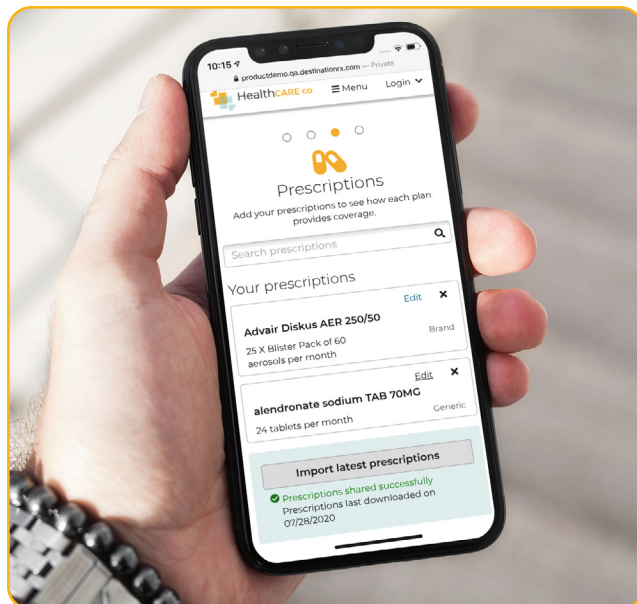

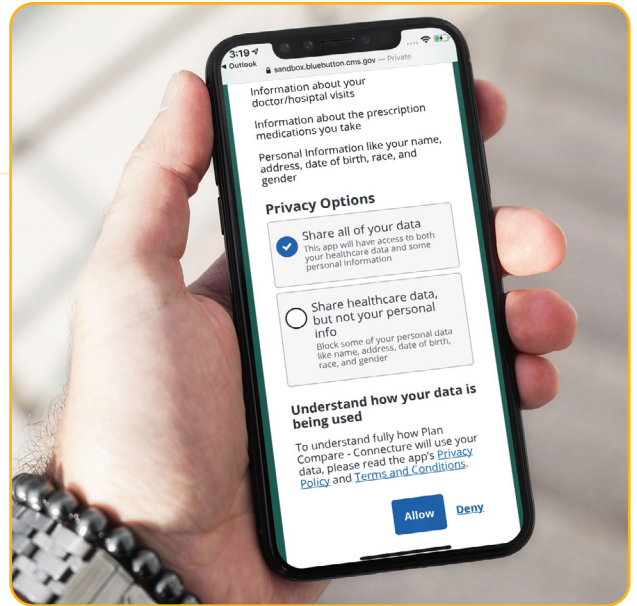

Agents can send an email to beneficiaries to request access to their MyMedicare.gov account to build their medicine cabinet securely and without error.

Beneficiary will receive an email from the agent that ConnectureDRX requests permission to access their Medicare data.

Beneficiaries click the link in the email and are taken directly to MyMedicare.gov where they can log into their account or create a new account.

The beneficiary has the option to Allow or Deny Access. They also have privacy options, including the ability to share all their data, or share healthcare data only without sharing any personal information.

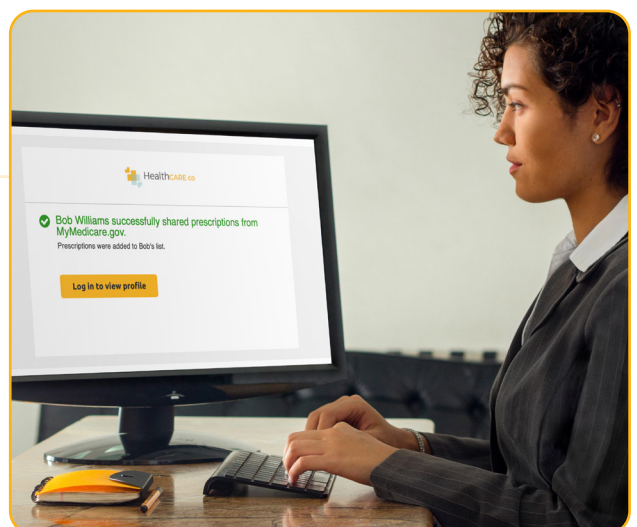

APPROVES ACCESS

If the beneficiary approves access, the drug list will automatically import into the platform and they will be able to see what prescriptions have been added to their medicine cabinet.

Beneficiary will also receive notification that their medicine cabinet has been shared with their agent.

APPROVES ACCESS – AGENT VIEW

Agents will receive notification that the beneficiary has approved access to MyMedicare.gov and prescriptions have been successfully shared.

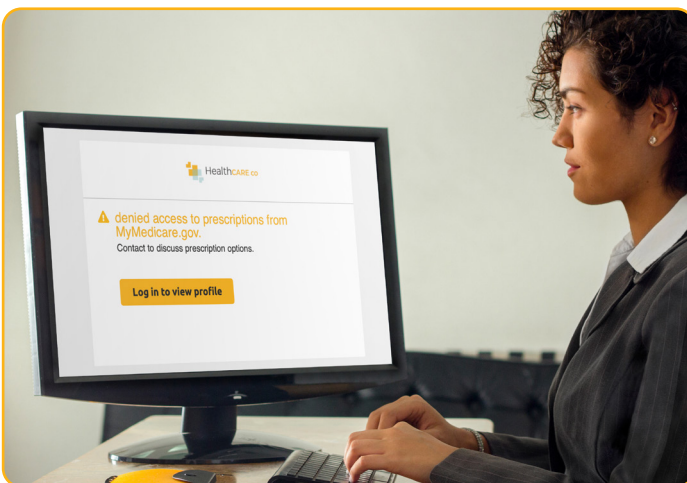

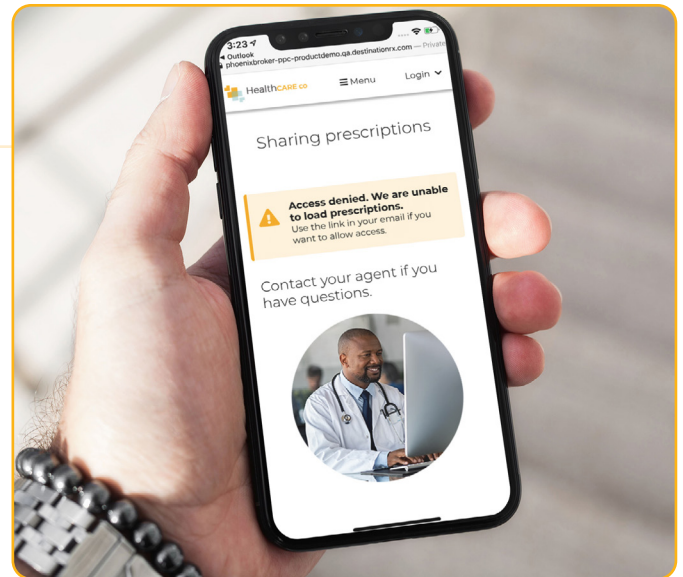

Once the prescription list has been downloaded to the beneficiary's account, agents will be able to see the list of prescriptions.

DENIES ACCESS:

If the beneficiary denies access to MyMedicare.gov and their prescription list, they will see the following notification. If this was done in error or they change their mind, they can click the link from the email to start the process again and grant access.

DENIES ACCESS - AGENT VIEW

Agents will also receive notification that access to MyMedicare.gov has been denied by the beneficiary, alerting you that the prescription list will not be populated via this source.
